Three leaks, three fixes

Recommendation	Leak	Sum of Size (R)	Type
Fix delivery promises and the slowest states; track late % weekly	1. Late deliveries	9,698.77	Estimated loss
Renegotiate carrier rates; set minimum order value on high-freight categories	2. Excess freight	2,72,385.18	Gap vs average freight rate
Seller scorecards, probation for repeat offenders, onboarding support	3. Weak sellers	7,50,881.66	Revenue exposed

Assumptions: no cost data; late-delivery loss assumes each lost repeat customer would order once more; Weak seller = at least 30 orders AND (late rate ≥ 15% OR average review <3.5)
